Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 March 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

1. This communication is responsive to your preliminary amendment filed 3/2/04.

Claims 1-15 are pending in this application.

#### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Specification***

3. The disclosure is objected to because of the following informalities: Paragraph 0002 of the specification makes reference to "patent Document 1", this description should be changed to a specific reference to the actual document referred to in the same page. The specification also makes reference to Fig. 1 and Fig. 7 which figures, do not exist, only Fig. 1A, 1B, 7A and 7B. Applicant is urged to revise the specification to consistently refer only to drawings present in the same.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al. P.N. 6,774,633 (Wang) in view of Whittaker et al. P.N. 5,573,220 (Whittaker).

Wang discloses a MRI magnet isolation support system. Applicant's attention is directed to Fig. 2 and corresponding description. Note also, the description on the frequency selection of the attenuator or damper in col. 7 lines 4-13.

Wang meets all the limitations of the claims at issue except for the "posture adjusting device" of the support. This difference however, would have been obvious to the artisan of ordinary skill in the art at the time the invention was made in view of Whittaker.

Whittaker discloses a heavy machine support that is frequency tunable and that contains a leveler or posture adjusting device. See Fig. 2 and 3 and corresponding descriptions of the same.

To use Whitaker's device to support a MRI as disclosed by Wang would result in the invention as claimed. Note that one suggests the use of commercially available vibration isolators (see col. 2 lines 63-67 and col. 4 lines 1-31) and that he realizes that posture adjustment or leveling may be a desirable feature (see first paragraph of col.6).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stofiel, Takamori et al., Minas et al., and Laskaris et al. all disclose support systems for MRI magnets. Note the description of the cover drawing of each of these documents.
